

Windows 7 Computer Teardown

This is a teardown of my old computer for learning purposes.

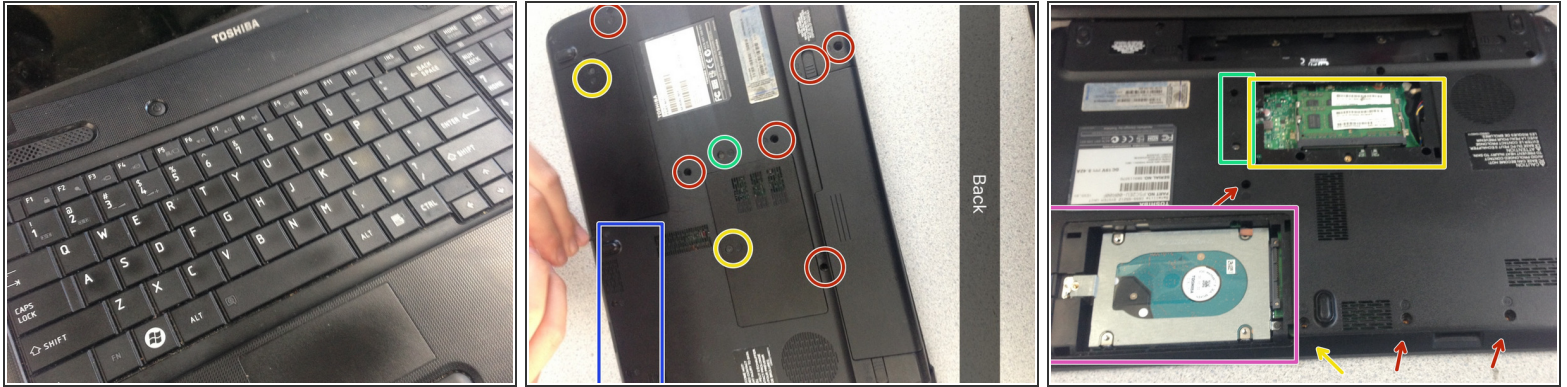

Written By: Ahmad Williams

INTRODUCTION

This is a teardown of my old computer for learning purposes.

Step 1 — Aquire Computer...

- Turn The Computer On Its Back, Take out harddrive, battery, by screwing. Only one designated screw driver needed.

Step 2 — Pry Off Keyboard

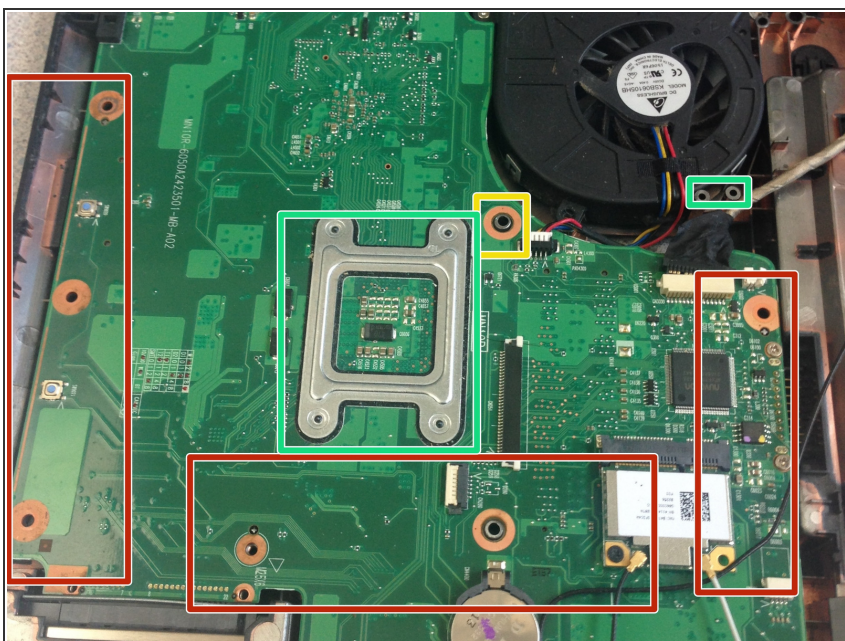

- Be careful, pry gently to avoid breakage.

Step 3 — Unscrew Clamps That Hold The Screen Intact

- You can use the same tool used to pry off the keyboard.

Step 4 — Start Unscrewing Fan And Motherboard

- Just like in real life, the mother can be fragile so proceed with care.

Step 5 — Remove Disk Drive And Hardrive

- Righty Tightly, Lefty Loosely...

To reassemble your device, follow these instructions in reverse order.
